The screenshot shows a web browser window with the address bar displaying `http://imagecodr.org/get.php`. The browser's tab bar includes several open tabs: "did-skolen", "Hvitt kjøtt | ...", "Lesesentere...", "it's it's learning ...", "Welcome to ...", "31 Google Kale...", "forskning.n...", and "Forsøk: Lag".

The main content area of the browser displays the "ImageCodr" website. The header of the website includes the "ImageCodr" logo and the tagline "HTML code for Flickr images". Below the header is a navigation menu with four links: "Home", "Get code!", "Search", and "Licenses".

The main section of the page is titled "Getting your HTML code". It contains the following text:

Please tell us the Flickr URL of the photo you are interested in, for example:

`http://flickr.com/photos/aussiegall/370467465/`
or
`http://flickr.com/photos/aussiegall/370467465/sizes/s/`

Below this text is a form with a label "Flickr URL:" followed by a text input field containing the URL `http://www.flickr.com/photos/dodo-bird/477499086/`. To the right of the input field is a button labeled "Send inn". This entire form area is circled with a red oval.

Below the form, there is additional text: "In case you want to use it regularly, simply drop the following link to your browser's toolbar, and click it when viewing an image: [ImageCodr](#). This will submit the Flickr URL automatically."
